McKeen Asma

Full-Stack Developer — Next.js, React, TypeScript, Laravel, Supabase · AI integrations

Davao City, Philippines (UTC+8) · mcknasma@gmail.com
Portfolio: https://mckenneth.vercel.app · GitHub: https://github.com/mcknx · Live client app: https://tref2.vercel.app

Availability: open to a full-time remote role (40 hrs/week); can start this week and work US, UK/EU or AU business hours.

SUMMARY

Full-stack developer building web and mobile apps since 2021; freelance since 2025 on short contracts and part-time roles for multiple clients; now looking for a full-time remote role. Strongest in React/Next.js with Supabase/PostgreSQL back ends; also Laravel/PHP, Node.js and Python. AI-first: Claude Code is my everyday driver, alongside Cursor. I plan the work, then review and test everything the AI writes, so features ship fast and well documented.

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, Tailwind CSS, HTML5, CSS3, Redux, Context API, React Native, Vue.js, Angular, Material UI

Backend & data: Node.js, Express, REST APIs, Laravel, PHP, Supabase, PostgreSQL, MongoDB, MySQL, Firebase, Python (Django)

AI & automation: Claude Code (daily driver), Cursor, n8n + Claude automations, GoHighLevel workflows

Tools: Git, GitHub, Bitbucket, Vercel, Jira, Trello, Figma

EXPERIENCE

Freelance Full-Stack & AI Developer — multiple clients · Remote Feb 2025 – Present

- Short contracts and part-time roles: web apps, maintenance and bug fixing, client sites and AI workflow automations.
- Tref2 (private client, 2024 – 2025): built a dashboard-style web app on Next.js + Supabase (PostgreSQL) and shipped it to production on Vercel, with ongoing fixes and features. Live: https://tref2.vercel.app
- Tapflare (agency contract): GoHighLevel pages, funnels, workflow automations and email campaigns for three client brands at once, from Figma into native, client-editable elements.
- AI-first delivery: Claude Code for planning, building, testing and review every day, plus Cursor.

Full-Stack Developer — Faithful Development · Remote Apr 2024 – Feb 2025

- Developed web, mobile and backend solutions full-time, coordinating regularly with the manager.

Frontend Developer — Steelx Pty Ltd · Remote Nov 2022 – Apr 2024

- Worked on an SVG-based shed layout renderer (plan + elevations, bays, doors/openings, dimension lines) and a workflow designer (flow diagrams) in React, Tailwind CSS and C#: UI enhancements, bug fixes, API integrations.

Frontend Developer — Tactiv Studios Design and Development · Remote Apr 2022 – Nov 2022

- Translated detailed Figma designs into code with React, Tailwind CSS and Angular, working closely with designers; integrated APIs.

Full-Stack Web & Mobile Developer — WAL Software Solutions · Davao City Apr 2021 – Apr 2022

- Maintained legacy code and led projects from inception; guided junior developers. Projects: Trial Pulse (mobile frontend), OneStopSnap (full-stack mobile), Sureplus and Sliver (full-stack web) — React, React Native, Vue.js, Firebase, MySQL, MongoDB.

SELECTED PROJECTS

- **SVG Shed Layout Demo** (React + SVG) — interactive multi-view shed estimator: plan + four elevations, bays, openings, dimension lines. Anonymized portfolio recreation. https://svg-shed-layout-demo.vercel.app
- **BridgeOps Integration Hub** (React + TypeScript + Vite) — integration ops console: connectors, webhook simulator, ETL field maps, RAG-ready chunks. Portfolio pattern demo. https://integration-ops-hub.vercel.app
- **FIFA Coin** (React + TypeScript + Vite + Tailwind + GSAP) — animated landing page with live countdown and live leaderboard; sole developer, design to deploy. https://fifa-coin-kappa.vercel.app

EDUCATION

BS Information Technology — University of the Immaculate Conception 2018 – 2022
